

Decision on temporary restriction of crossing the border crossings of the Republic of Croatia

In relation to the old Decision, the most important change is that there is no longer a ban on entry, regardless of which countries and for what reasons you come to the Republic of Croatia.

Third-country nationals will be able to cross the border without proving the reason for their arrival, i.e. it will be enough to meet the epidemiological conditions (Covid certificate)

As for people coming from the EU, they will no longer need a COVID certificate to enter Croatia. Also, the restriction on crossing border crossings does not apply to displaced persons from Ukraine.
